

PROFESSIONAL NURSE ADVOCATE TRAINING PROGRAMME

The NHSE Professional Nurse Advocate (PNA) Level 7 Accredited Training Programme facilitated via the Staffordshire training Hub (STH), focuses on the four functions of the Advocating for Education and Quality and Improvement (A-Equip) Model; however, the primary focus will be on restorative clinical supervision.

The training will provide the participants with the skills to facilitate restorative supervision to enhance health and wellbeing to colleagues and teams within Primary Care services and beyond.

In addition, the training equips nurses to lead and deliver quality improvement initiatives in response to service demands and changing patient requirements.

This fully funded on-line course will be delivered via a Higher Education Institute (HEI) over a 5–10 week period with a total of 10 study days.
